Phonics and English Readiness Programme (ERP)

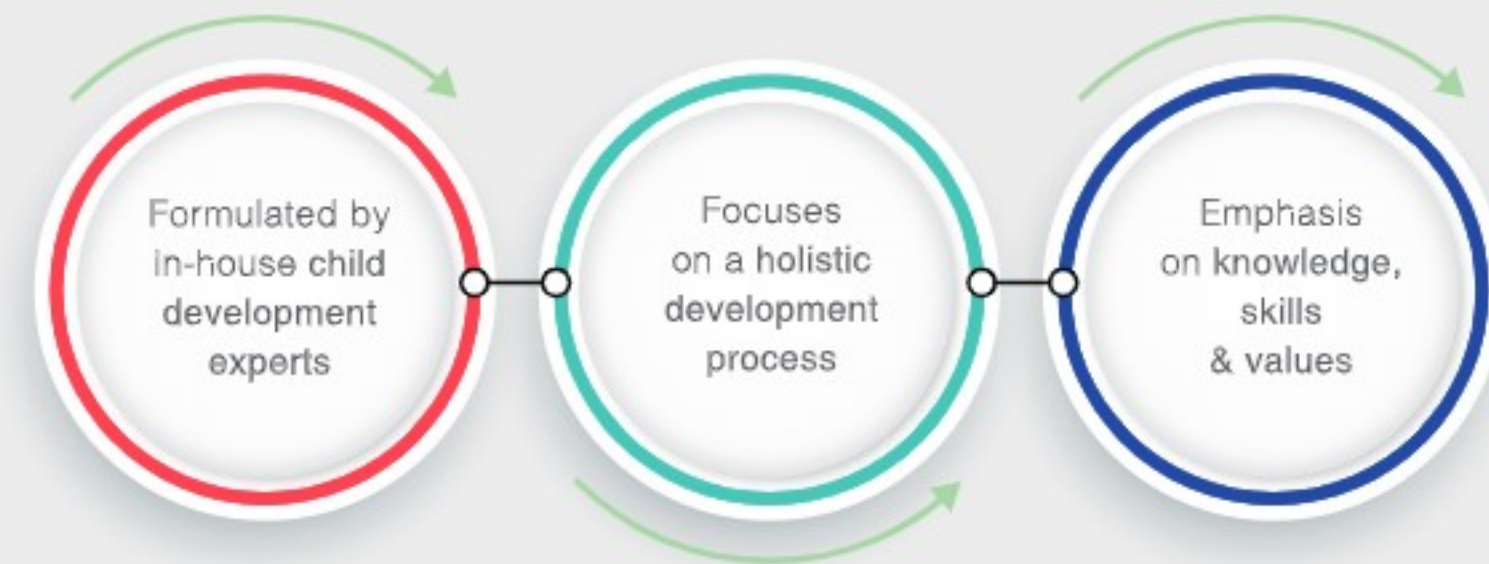

It is not only enough to be fluent in English, but also to be aware of the right pronunciation and understanding of the language nuances. Keeping this in mind, Kidzee has designed a unique programme – Phonics and ERP. This programme is fully integrated into the curriculum, aiding the child with fluency in the language and its delivery.

EMERGING STUDENT PROFILE (ESP)

MOULDING SUCCESSFUL CITIZENS OF TOMORROW.

ESP is a homegrown unique assessment and nurturing programme that makes Mount Litera Zee School distinctive. Under ESP, we make sure that everything that we do at Mount Litera Zee School, systematically and effectively helps the child achieve his or her best. And, of course, to become the thought-leaders of tomorrow. This is achieved by combining three essential faculties in ESP: Life Skills, Knowledge and Core Values.

MAKING STUDENTS LIFE-READY

We believe that every child has a unique potential. Interactive iLLUME, our 8-fold unique pedagogy sets Kidzee apart from other preschools by realising your child's potential in a systematic, synergetic and self-paced manner.

LIFE READY FRAMEWORK

To ensure that a child is groomed to be Life Ready and not just school or job ready, a set of 12 characteristics given below are defined which are aligned to the 21st century skills.

- | | | |
|-----------------|-------------------------|-----------------------|
| • Inquirer | • Innovative | • Logical |
| • Confident | • Leader | • Empathetic |
| • Healthy | • Caring | • Responsible Citizen |
| • Eco-conscious | • Digitally Responsible | • Life-Long Learner |

NEW ADDITIONS TO THE PROGRAM

Personality development module

Following the Life ready framework, an entire module on Personality development of children has been incorporated in the curriculum, where children, over a period of 4 years will become more confident, self-aware, and develop a positive outlook towards life.

Eco-consciousness

An equal impetus is placed on the child being a responsible citizen as well as a responsible individual as a part of most important skillsets required in the 21st century.

Critical thinking

This module focuses on posing problems to children and helping them solve it. Children are inspired to draw on their existing knowledge and experience and apply it to the newly posed problem by recognising, recalling, distinguishing, classifying, predicting, inferring, evaluating, analyzing and synthesizing to reach the desired solution.

TECHNOLOGY-ENABLED LEARNING

In today's world, it is hard to ignore the influence and significance of technology in the education scenario. Understanding this, Kidzee has designed its curriculum integrating a healthy affinity towards technology. However, it is strictly monitored that technology is not overpowering the simplicity of learning. The teachers at Kidzee ensure that the children are not overtly getting attached to gadgets and gizmos, thus maintaining a perfect balance of technology-friendly learning.
