We believe in being active participants, not passive recipients

Nalanda Gurukul students can focus better on their studies because television, video games, mobiles, and other distractions are limited. Children get all facilities under one roof, whether it is the library and laboratories for their studies or music and sports for extracurricular activities. They have the guidance of teachers throughout the day, which makes learning easier for them. They can seek teachers' assistance at any time of the day.

Nalanda Gurukul has its own benefits; it prepares students to be self-confident. They grow up early and understand the importance of time. Here, a child has to make decisions about choosing companions, finding time to study, mixing with all kinds of students, and facing day-to-day problems on their own. In brief, they mature faster in their student life, become less dependent on others, and learn to be more self-confident.

They reside in a community where traits such as honesty, respect, and hard work are valued. Nalanda Gurukul school students quickly learn how to perform many domestic chores and complete school assignments by themselves. Everyone wants to feel that their parents are proud of them. They can develop their skills in many ways because they have time to engage in different activities at boarding school.

Nalanda Gurukul campus environment ensures that students are immersed in an educational world where learning is the center of all activities. It's a unique setting that promotes a common experience of friendship, trust, and honesty.
