PLENUM IN NEWS

The Plenum School, Nahan

Bringing international curriculum home

Chuck Grawley rightly said 'What makes a child gifted and talented may not always be good grades in school, but a different way of looking at the world and learning'. Education should be about learning and exploring, not about the pressure. Because education and learning shouldn't end when the last textbook is closed or when the diploma is handed out. It should only end when we do. Working on this academic ethos is Plenum School in Nahan which claims to be the only fully residential school offering Cambridge Board curriculum in the region. The school has been set up under the aegis of Changemaker Society, Cambridge Assessment, promote a hands-on approach to teaching and learning. Life learning is not at all encouraged by the Cambridge board. Students must understand the concepts thoroughly. The questions require students to apply concepts to real-world scenarios and case studies, which improves their analytical and critical thinking skills.

The school teaches students how to stand for themselves, how to draw their own conclusions, find what they're interested in and develop a plan to pursue it, engage with others and form long-lasting relationships along the way. And most importantly, how to learn.

The school not only teaches that our 'Why' for life is more important than our 'What' for life but also, failure is nothing but just a path of growth.

Infrastructure

Build-up area of about 50,000 sq. ft. Complete with 25 classes, labs with all modern and international equipment and devices, library, computer center, dining hall, Wi-Fi enabled campus, offices, hostel, guest houses, teachers' residence etc. We have an open MP Hall beautifully designed with a sloping and colorful roof.

The school has facilities for Basketball, Table Tennis, Skating, Volleyball, and a smaller soccer field. Children go for regular breaks and recreation every 15 days. "The location of our school is a blessing for nature and for health. Regular breaks in the nearby hills keeps our faculty and students fit and healthy. Every trek and excursion helps in improving endurance, reduce stress, improve cardiovascular and muscular strength. Excursions promote socializing, help develop managerial skills and improve cultural understanding," says Kirti Bhatnagar.

DIRECTOR'S WORD

Our students learn GCSE, computer, with a lot of subject choices matching to their interests and areas. As we are here to serve a global community, we avoid internationally mobile families in making a smooth transfer to any school system or graduate to universities worldwide. We are passionate about creating a 'learning' institution that is dynamic and constant seeking excellence to meet the needs of the present as well as the future, while learning from the ethical and moral values systems of the Indian past.

FOUNDING PRES

one of the Founders of the school.

Disciplined learning is provided rather than traditional rote learning. Students can learn by doing with hands-on experience to grow their knowledge to depths. They learn to think in such a way that students are able to develop their confidence, responsibility, effective problem-solving and innovation.

Learning amid Covid

The Covid-19 has forced education systems worldwide to find alternatives to face-to-face instruction. The school was shut down for a short period of time. It was the only school in the region that provided offline classes during Covid.

CAMBRIDGE vs CBSE BOARD

The Cambridge Assessment International Education (CAIE) programme is affiliated with the world renowned University of Cambridge and is recognised by schools all over the world. In comparison to CBSE, Cambridge Board provides a global learning community and is more intellectual and practical. It is apt for those students who aim to study abroad in the future. Creative thinking and problem-solving are the main prerequisites of the Cambridge board.

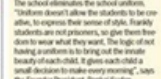

Being an international education board, the Cambridge board has widespread international recognition as compared to the CBSE board.

Students who have studied from Cambridge have an advantage when applying to universities abroad, especially in the UK.

In the Cambridge board curriculum, the students are allowed to take up a minimum of 5 subjects and a maximum of 14 subjects. English, mathematics, and science are the main subjects offered by the Cambridge board. A student also has an option to choose their other subjects which range from social sciences, arts and technology.

Subjects offered by the CBSE education system are more emphasis on the rote learning.

The school eliminates the school system, "Students don't allow the students to be creative, to express their sense of style. Ready-made students are not prepared, so give them freedom to wear what they want. The light of not having a uniform is to bring out the innate beauty of each child. It gives each child a small decision to make every morning," says the Founder President, Pankaj Sudan.
